Practical Psychology for Policing

Develop an understanding of police decision making in the 21st century and how psychology can be applied to routine police practice.

EDUCATION COURSES

Delivering Effective Teaching and Learning

Explore pedagogical strategies, teaching and learning methodologies, and areas of improvement in teaching while becoming a reflective professional practitioner.

Digital Learning and Inclusion

Consider the challenges of delivering educational methods and look at how those with autism, dyslexia, and ADHD can be supported in digital learning.

Philosophy of Education and Theories of Learning and Teaching

Delve into the historical, philosophical and cultural contexts of modern education while learning how to apply key concepts, values and benefits of education to real-world scenarios.

HEALTH COURSES

Applied Pathophysiology and Pharmacology in Management of Disease

Understand how physiology, pathology and pharmacology link to disease and explore potential risk factors that make individuals more susceptible.

Communicable Disease Control

Analyse deliberate, man-made and natural infection outbreaks, their impact on society and how to mitigate the risk of recurrence.

Diabetes: Prevention, Care and Management

Discover the personal, environmental and societal factors contributing to the rise in diabetes and investigate ways to combat one of biggest challenges facing healthcare today.

Epidemiology

Investigate the core principles of epidemiology to understand how diseases are controlled and how to make decisions which improve public health.

Evidence-based Decision Making in Nursing Practice

Develop the higher-level skills required to interpret, critique and evaluate evidence within clinical practice using the EBP toolkit.

Healthcare Leadership in Practice

Learn about the different leadership styles within healthcare and how to drive performance and positive change.

Health Needs Assessment and Priority Setting

Explore the tools and techniques used for structured health assessments while identifying priorities based on real-world scenarios.

Health Promotion

Explore strategies that support promotional activity, while deepening your understanding of health promotion and the models and frameworks used to empower individuals and communities.

Healthcare Management: Principles and Practices

Develop the leadership skills to manage complex areas of change, culture and innovation while exploring the challenges facing healthcare managers.

Infection Prevention and Quality Improvement

Gain a thorough understanding of medical interventions to mitigate the risk of outbreaks, while considering the importance of maintaining quality and standards in healthcare.

Introduction to Global Mental Health and Wellbeing

Take on a global perspective while exploring initiatives that reduce the burden of mental health and promote wellbeing for people across different countries.

Introduction to Medical Microbiology and Immunology

Journey through the history of microbiology up to the latest discoveries in contemporary society and understand the role of immunology in the control and development of disease.

Meeting the Needs of Vulnerable Patients

Explore the main concepts and theories of vulnerability while considering global perspectives on those classed as vulnerable in society.

Mental Health over the Life Course

Delve into the universal symptoms of mental ill-health while considering the social and cultural difference to mental health treatments across the globe.

Strategic Management in Healthcare

Explore strategic management in a healthcare context and learn how to put effective roadmaps in place to achieve objectives.

Principles and Practices of Pain Management

Learn about the concept of pain and how humans perceive it, while exploring the role of analgesia and non-pharmacological interventions in pain management.

Topics in Public Health

Explore current public health issues on a global scale and learn about future considerations so you can make a real difference in your own community.

LAW COURSES

International Business Law

Develop a strong familiarity with the general principles of transnational contract law to overcome cultural, language and legal differences in cross-border transactions.

International Competition Law

Gain in-depth knowledge of the devices and the laws, articles and regulations relied upon to combat manipulated marketing conditions.

Law of World Trade Organisation

Dive into the development of the World Trade Organisation (WTO) and understand the framework for implementing and monitoring agreements within the global rules of international trade.

PSYCHOLOGY COURSES

Critical Social Psychology

Delve into the historical and contextual foundations of critical social psychology and explore critical ideas within contemporary psychological and socio-political issues.

Global Environment and People Management

Examine the economic, institutional, social, and global contexts of people management and consider globalisation and technological advancements effecting HR strategies.

Human Development Over the Lifespan

Explore key development points throughout the life cycle and gain a deep understanding of attachment, social relations, and cognitive and language development.

Mentoring and Coaching for Organisational Effectiveness

Explore key aspects of delivering ethical, effective and efficient mentoring and coaching strategies in local, national and international contexts.

Psychological Assessment at Work

Cover a range of topics including assessment principles and theory in work psychology, candidate fit and organisational change, and work-based behaviours from a psychological perspective.

Psychobiology and Neuroscience

Discover the fundamental elements of psychobiology and neuroscience and apply this knowledge to a topic of interest to you – such as personality, intelligence, addiction, depression and more.

Psychology Skills and Employability

Explore the importance of evidence-based practice, while examining assessments related to performance appraisal, development and selection.

WHAT ARE THE BENEFITS?

There are many benefits to studying an online professional course with us:

Open entry route

You don't need any prior academic or work experience to study with us. You'll just need to meet our English language requirements.

Alumni discount

University of Essex and University of Essex Online graduates are eligible for a 10% alumni discount.

Academic credits

You'll receive 20 academic credits at postgraduate level, which can be applied to progression onto a PG Cert, PG Dip or full Masters degree.

Digital certificate

You'll be awarded a recognised qualification by the University of Essex.

60th anniversary scholarship

To celebrate the University of Essex turning 60, we're offering a 10% scholarship on all online professional courses.

Reskilling and upskilling

Studying an online professional course is a great way to reskill or upskill in a new field, or embark on a different career direction.

SPONSORSHIP ADVICE

Did you know your employer could cover part or all of your course fee?

Did you know your employer could cover part or all of your course fee?

If there's an online professional course you're interested in and that's relevant to your current role, your employer may be willing to help you excel in your career.

The best place to start is to have a chat with your line manager or HR representative. You'll want to discuss:

- how an online professional course would benefit the company
- any previous training you've completed and how this would build on your existing experience
- your future goals and career aspirations
