This module aims to:

- Assess the academic readiness of new students
- Develop the foundation skills and competencies required to successfully engage in online Higher Education learning
- Deliver the opportunity for students to explore personal opportunities and objectives in their current and future organisational roles through the development of a wide range of skills, behaviours, attributes and competencies.

Students will be encouraged to reflect critically upon such concepts as self-awareness, lifelong learning and developing capability throughout the module.

Learning outcomes

On completion of this module, students will be able to:

- Demonstrate the technical and personal requirements of online learning
- Demonstrate competencies in the use of the tools available to online learners
- Possess the ability to reflect on activities and personal development in terms of both process and task
- Identify effective operational techniques in a variety of learning contexts
- Explain the organisational, environmental and societal contexts in which their careers and lives will unfold.
- Possess the ability to cite and reference academic sources using the American Psychological Association (APA) style of referencing.
