Module Code: MHSW  
NQF level: 4  
Credit Value: 15  
Study duration: 9 weeks

**Module description:**
Focusing on ethical and cultural approaches to mental health, well-being and treatment, this module examines the scientific principles behind a spectrum of mental health disorders, and assesses a variety of evidence-based treatment planning options for mental health conditions.

**This module aims to:**
- critically evaluate theories of mental health, stress and well-being;
- critically evaluate the problems faced by people experiencing mental health disorders;
- critically evaluate the interventions designed to increase well-being and reduce or manage the symptoms of mental ill-health.

**Learning outcomes**
On completion of this module, students will be able to:
- Analyse the historical and cultural influences in the development of theories of mental health wellbeing.
- Understand the key theories that contribute to the development of therapeutic models and approaches in health, stress and wellbeing;
- Critically evaluate components of mental health interventions;
- Demonstrate an awareness of the ethical concerns within the discipline.

**Syllabus**
- An introduction to psychological appraisal and treatment
- Therapeutic models and approaches
- The therapeutic alliance
- Assessments in mental health
- Professional and ethical perspectives in psychological appraisal and treatment

**Learning and teaching methods**
The pedagogical approach for this module is informed through the principles of collaborative enquiry and constructionism. Collaborative enquiry is supported through our internet-mediated learning platform the aim of which is to develop a learning community that supports dialogue and collaboration between students through online peer discussion and debate to construct a unique learning experience which will enhance their subject understanding through social interactions which empowers them to explain their understandings, receive feedback from tutors and peers.

Teaching will be delivered through the provision of specified reading materials that will be provided on the UoEO Learning Platform, and will be supported by specified discussion forums, pre-recorded lecturecasts and biweekly online question and answer sessions (using synchronous communication software and application sharing facility). Students will be provided with indicative guidance on, and encouraged to look at relevant websites which are appropriate to the learning outcomes, and to identify and share appropriate web-based resources (as learning support references) with their fellow students. The pre-recorded lecturecasts and the online question and answer sessions will include referenced use of selected case studies which will be drawn from the reading materials and the practice-based and professional/educational contexts and experience of the Tutors. Self-managed learning will supplement lectures and students will be given direction on required and indicative reading.
